A-Mark Precious Metals Reports Fiscal Second Quarter 2014 Results

- **Company reports 25% increase in gross profit in quarter**
- **Margins improve due to favorable change in product mix**

SANTA MONICA, Calif.--(BUSINESS WIRE)--**A-Mark Precious Metals, Inc. (NASDAQ: AMRK)**, a full-service precious metals trading company, reported results for the 2014 fiscal second quarter ended December 31, 2013.

Fiscal Q2 2014 Highlights

- Revenue totaled \$1.49 billion
- Gross profit was \$7.8 million
- Net income totaled to \$2.2 million

Fiscal Q2 2014 Financial Results

Revenue for the three months ended December 31, 2013 was \$1.49 billion compared to \$1.70 billion in the year-ago quarter. The decrease in revenue was primarily due to a decline in commodity prices for gold and silver. A decrease in the volume of gold ounces sold was largely offset by an increase in the volume of silver ounces sold, as well as stronger demand for custom silver products through certain distribution contracts.

Gross profit was \$7.8 million, representing a gross profit margin of 0.5%, an improvement from a gross profit of \$6.3 million or a gross profit margin of 0.4% in the year-ago quarter. Gross profit and profit margin improved as a result of increased sales of custom silver products through certain distribution contracts. Sales to distributors of unique bullion products for marketing to the retail public generate higher margins than the company's ordinary trading activities.

General and administrative (G&A) expenses increased to \$4.5 million from \$3.0 million in the year-ago quarter. The increase was primarily due to higher personnel expenses; specifically recruiting and retention fees related to the addition of key employees. A one-time favorable adjustment in the prior period also contributed to the variance.

Net income totaled \$2.2 million or \$0.29 per diluted share, as compared to \$2.5 million or \$0.32 per diluted share in the year-ago quarter. The decrease in net income was primarily attributable to the increase in G&A.

Management Commentary

“The 25% increase in gross profit and strong profitability in the quarter reveals the special nature of our business and trading platform, where our topline can be volatile but our bottom line performance is not impacted,” said Greg Roberts, A-Mark’s CEO. “It’s also important to note how our custom products—which had an increasingly positive effect over the last several months—enhance gross margins and profitability, while remaining largely unaffected by short-term fluctuations in commodity prices.”

The company’s stock began trading on the NASDAQ Global Select on March 17, 2014. Management plans to begin hosting regular quarterly conference calls beginning with its fiscal third quarter results ending March 31, 2014, with the date and time to be announced approximately a week prior.
