Fiscal Q3 2019 Financial Results

Revenues decreased 36% to $1.27 billion from $1.99 billion in the same year-ago quarter. The decrease in revenues was mainly due to lower forward sales and lower gold and silver prices, offset by an increase in the total amount of silver ounces sold.

Gross profit increased 17% to $8.7 million (0.69% of revenue) from $7.4 million (0.37% of revenue) in the same year-ago quarter. The increase in gross profit was primarily due to improved gross profits from the Wholesale Trading & Ancillary Services and Direct Sales segments.

Selling, general and administrative expenses decreased 12% to $8.3 million from $9.4 million in the same year-ago quarter. The decrease was primarily due to lower operating expenses incurred by the Direct Sales segment of $1.4 million, which were partially offset by increased overall compensation costs of $0.5 million.
Interest income increased 18% to $4.8 million from $4.1 million in the same year-ago quarter. The increase was driven primarily by an increase in other finance product income of $0.4 million related to customer repurchase arrangements and an increase in interest income from the Secured Lending Segment of $0.2 million due principally to an increase in the value of the secured loan portfolio.

Interest expense increased 16% to $4.2 million from $3.6 million in the same year-ago quarter. The increase was primarily due to the newly issued notes payable related to the Secured Lending segment and an increase in liability on borrowed metals, partially offset by a reduction of interest expense from product financing arrangements and the repayment of the Goldline Credit Facility.

Net income totaled $990,000 or $0.14 per diluted share, an improvement from net loss of $633,000 or $0.09 per diluted share in the same year-ago quarter.

**Fiscal Nine Months 2019 Highlights**
- Revenues for the nine months ended March 31, 2019 decreased 33% to $3.93 billion from $5.84 billion for the nine months ended March 31, 2018
- Gross profit for the nine months ended March 31, 2019 increased 8% to $25.5 million (0.65% of revenue) from $23.6 million (0.40% of revenue) for the nine months ended March 31, 2018
- Net income for the nine months ended March 31, 2019 totaled $3.0 million or $0.43 per diluted share, as compared to a net loss of $360,000 or $0.05 per diluted share for the nine months ended March 31, 2018
- Gold ounces sold in the nine months ended March 31, 2019 increased 9% to 1.4 million ounces from 1.3 million for the nine months ended March 31, 2018
- Silver ounces sold in the nine months ended March 31, 2019 increased 45% to 55.1 million ounces from 37.9 million for the nine months ended March 31, 2018

**Fiscal Nine Months 2019 Financial Results**
Revenues decreased 33% to $3.93 billion from $5.84 billion in the same year-ago period. The decrease was primarily due to lower forward sales and lower gold and silver prices, offset by an increase in the total amount of gold and silver ounces sold.

Gross profit increased 8% to $25.5 million (0.65% of revenue) from $23.6 million (0.40% of revenue) in the same year-ago period. The increase in gross profit was primarily due to improved gross profits from the Wholesale Trading & Ancillary Services and Direct Sales segments.

Selling, general and administrative expenses decreased 6% to $24.1 million from $25.7 million in the same year-ago period. The decrease was primarily due to lower operating expenses incurred by the Direct Sales segment of $2.0 million, lower investigatory acquisition costs of $0.7 million, lower legal costs of $0.3 million, which were partially offset by increased overall compensation costs of $1.4 million.

Interest income increased 33% to $14.0 million from $10.5 million in the same year-ago period. This increase was driven primarily by an increase in other finance product income of $2.1 million related to customer repurchase arrangements and an increase in interest income from the Secured Lending Segment of $0.7 million due principally to an increase in
the value of the secured loan portfolio.

Interest expense increased 28% to $12.4 million from $9.7 million in the same year-ago period. The increase was primarily due to the recently issued notes payable related to the Secured Lending segment and an increase in liability on borrowed metals, which was partially offset by a reduction in interest expense related to product financing arrangements and the repayment of the Goldline Credit Facility. In comparison to the same year-ago period, interest expense increased $2.8 million related to the recently issued notes payable and $0.8 million related to the liability on borrowed metals. This was partially offset by a decrease of $0.4 million related to product financing arrangements and $0.2 million related to the repayment of the Goldline Credit Facility.

Net income totaled $3.0 million or $0.43 per diluted share, an improvement from a loss of $360,000 or $0.05 per diluted share in the same year-ago period.

Management Commentary

“During the third quarter, we leveraged our diversified platform and longstanding relationships to capitalize on moderate market volatility and demand for A-Mark’s physical products,” said company CEO Greg Roberts. “The operational success we achieved during the quarter is evidenced by the improvement of key financial metrics, most notably gross profit, net income and silver ounces sold. We also saw solid increases in nearly all of our key financial metrics for the first nine months of the fiscal year, reflecting both improved market conditions and the effectiveness of our scaled platform and business model, which is structured to provide diverse sources of income and predictability.

“While we achieved solid results year-to-date and have one of the most expansive product and service offerings in our industry, we are continuing to plan and judiciously invest in strategic growth areas to further diversify our business. One key area is our Direct Sales Segment, which improved performance in the third quarter due to the increasing demand for retail products coupled with the segment’s more streamlined operations and expense structure. In step with this, we are actively implementing initiatives to leverage technology to further enhance the customer experience, more effectively secure new customers, improve efficiencies and, ultimately, drive revenue and continue our trajectory towards profitability of the Direct Sales segment. Additionally, we are continuing to build out our finance portfolio, in which the total number of loans grew 33% from the quarter ended December 31, 2018.

“We remain optimistic about our long-term prospects, and believe we are aligning favorably with our business strategy to drive organic growth and enhance our model. In the near-term, we will continue to systemically build our platform to capture a greater share of the market regardless of political and economic conditions, while acting opportunistically to capitalize on attractive near-term trading opportunities and strategically to scale our business for long-term success.”
