EL SEGUNDO, Calif., June 29, 2020 (GLOBE NEWSWIRE) -- [A-Mark Precious Metals, Inc. \(NASDAQ: AMRK\)](#), a leading full-service provider of products and services to the global precious metals market, was added to the broad-market Russell 3000® Index at the conclusion of the annual reconstitution of the Russell indexes, effective after the U.S. market opens today, June 29, according to the [FTSE Russell website](#).

Annual Russell indexes reconstitution captures the 4,000 largest U.S. stocks as of May 8, ranking them by total market capitalization. Membership in the U.S. all-cap Russell 3000® Index, which remains in place for one year, means automatic inclusion in the large-cap Russell 1000® Index or small-cap Russell 2000® Index as well as the appropriate growth and value style indexes. FTSE Russell determines membership for its Russell indexes primarily by objective, market-capitalization rankings and style attributes.

“Joining the Russell 3000 Index represents another major milestone for A-Mark that we expect will increase awareness of our accomplishments,” said CEO Greg Roberts. “This follows several other recent achievements for our company, including the \$11.3 million in net income we realized in fiscal Q3 2020, which was the highest net income level for any quarterly or fiscal year period since A-Mark became a publicly traded company in 2014. We expect to leverage this additional exposure within the investment community into improved liquidity and greater awareness for our company, which should benefit both new and existing investors going forward.”

Russell indexes are widely used by investment managers and institutional investors for index funds and as benchmarks for active investment strategies. Approximately \$9 trillion in assets are benchmarked against Russell’s U.S. indexes. Russell indexes are part of FTSE Russell, a leading global index provider.
